PROFESSIONAL EXPERIENCE

MANTU.

DevOps Engineer

Tunis, Tunisia

2023 - Present

Designed, deployed and governed scalable Microsoft Azure **infrastructure** and CI/CD pipelines for production environments. Delivered measurable improvements in cost, compliance, performance, security and developer velocity. Led cloud migration, governance and global edge projects while automating deployments and observability.

- Built and optimized YAML-based CI/CD pipelines in Azure DevOps for .NET, Java, Node.js and Python applications; automated builds, tests, security scans and deployments, accelerating release cycles and reducing manual effort
- Automated application deployment, configuration management, and environment provisioning using Ansible playbooks across production and non-production environments
- Migrated 40+ legacy workloads to Azure using Azure Migrate and Terraform; implemented rightsizing, reserved instances and resource optimization, achieving ~42% annual infrastructure cost reduction
- Designed multi-environment governance model with Azure Policy and Azure Blueprints; enforced tagging standards, RBAC, Entra ID controls and security baselines, reducing compliance violations by 65%
- Implemented Azure Front Door with Web Application Firewall (WAF) and CDN for global web applications; reduced latency by 35%, enhanced DDoS protection and improved high availability for international users
- Designed custom alerts and dashboards enabling preventive incident detection
- Enforced secure access and zero-trust principles by implementing RBAC, Entra ID authentication, Private Endpoints, and integrated security scans in CI/CD pipelines

KEY PROJECTS

SECURE CLOUD PLATFORM FOR DVR VIDEO STORAGE, PROCESSING & SHARING

2023 – PRESENT

- Served as Project Manager; designed secure, scalable Azure architecture for video backup, processing and controlled access
- Supervised and mentored an intern, ensuring knowledge transfer and high-quality delivery

SECURE DEPLOYMENT OF DEPENDENCY-TRACK ON AZURE

- Implemented secure, private deployment using Private Endpoints and Entra ID authentication
- Eliminated public exposure and enforced identity-based access controls
- Documented complete solution architecture and deployment steps in a detailed technical article

EDUCATION

ECOLE SUPERIEURE PRIVÉE INGENIERIE ET DE TECHNOLOGIE (ESPRIT)

Tunis, Tunisia

Engineering Degree in IT Architecture and Cloud Computing

2020-2023

- Coursework: Cloud Architecture, DevOps Methodologies, System Design
- Minors: Networking, Security Fundamentals, Linux Systems

ECOLE NATIONALE D'ÉLECTRONIQUE ET DES TELECOMMUNICATIONS DE SFAX (ENET'COM)

Sfax, Tunisia

Bachelor of Engineering, Major in Computer Science; Minor in Mathematics

2017-2020

- Coursework: Computer Networks, Operating Systems, Python/Bash Programming

ADDITIONAL INFORMATION

- Technical Skills: Microsoft Azure, Azure DevOps, Jenkins, Terraform, Ansible, ARM Templates, Docker, Kubernetes, Azure Monitor, Log Analytics, Azure Front Door, WAF, CDN, RBAC, Entra ID, Azure Policy, Azure Blueprints, Virtual Networks, Private Endpoints, Bash, Python (basic to intermediate), Git, YAML Pipelines, Linux
- Languages: Arabic (Native), English (C1 – Professional), French (Professional)

CERTIFICATIONS

- | | |
|---|-------------|
| • Microsoft Certified: Azure Administrator Associate (AZ-104) | 2026 |
| • Google Cloud Associate Cloud Engineer | 2025 |
| • Microsoft Certified: Azure Fundamentals (AZ-900) | 2024 |
